Cars

MAINSAIL SYSTEMS

Triple car with 1 sheave. Ball bearing car in hard black anodized aluminum with four ball circuits: 2 Torlon ball circuits (lower) and 2 Delrin ball circuits (upper). The car will remain on the track even after ball bearing failure (overload). Side windows for easy maintenance and ball bearing cleaning and/or replacement. The car, the track and all components are extruded in high strength alloy and hard black anodized (steel parts: AISI 316). The sheet block is not included.

Technical characteristics

Width (W)

70 mm

Track dimensions

31 × 21 mm

SWL

4400 kg

Ø suggested block

150 mm
