Full Batten RECEPTACLES

For round batten.
For 10 mm threaded toggle.

The SBR is different from standard batten receptacles in that it fits **inside the batten pocket**, making it invisible on the outside except for the small fastening plate - thereby almost completely **eliminating chafe** on the mast and rigging. Moreover the batten will be not on one side, but perfectly **in the middle**. Each SBR includes: the **main body**; **side plates** to fix the receptacle to the sail; **trimming screw** for batten compression; the **cap** with a threaded hole to screw the receptacle in the toggle of the batten slider.
