

609.326

Full Batten **RECEPTACLES**

For round batten.
For 14-16 mm threaded toggle.

The **SBR** is different from standard batten receptacles in that it fits inside the batten pocket, making it invisible on the outside except for the small fastening plate. Thereby almost completely eliminating chafe on the mast and rigging. Moreover the batten will be not on one side, but perfectly in the middle. Each SBR includes: the **main body**; **side plates** to fix the receptacle to the sail; **trimming screw** for batten compression; the **cap** with a threaded hole to screw the receptacle in the toggle of the batten slider.
