

## C320SP - Below the deck furler - Max forestay dia: 7 mm

Part #C320SP

### Description

The C320SP is a manual headsail furler from the Profurl below-the-deck Cruising range. It is an aesthetic solution that also optimizes the luff for better performance. Its tack point is height adjustable. Maximum forestay diameter is 7 mm (#12 in rod). It features colorless anodized round extrusions. It comes with a 10-year warranty.

### Components

This product includes a drum, a complete set of grey rounded extrusions, a swivel and a turnbuckle cylinder. As a standard, it is delivered with short link plates
